

**BALI South Thames Region presents**

# **Green Roofs & Living Walls**

**Tuesday 16th February 2010 —5.45 to 9 p.m.  
Merrist Wood Campus of Guildford College  
Worplesdon, Guildford, Surrey GU3 3PE**

***Presentations by: Scotscape Living Walls,  
BioTecture Ltd and Q Lawns***

Green roofs and living walls are becoming almost mainstream these days—but there is still a lot to learn. This BALI South Thames event will provide designers, landscape architects and contractors with a practical overview of the materials and techniques available to you and your clients.

Our presenters are each at the sharp end of creating and installing these environmentally and aesthetically beneficial features and will give you the benefit of their expertise. If you're planning to incorporate them into your future designs, or are going to be constructing them, come and see how it's done.

***A 2-course supper will be served in Woody's Restaurant on the campus from 5.45 p.m.—6.30 p.m., when the restaurant closes.***
